Mr. Jake Peralta
Manager of Human Resources
B99 Software
2000 Amy Street
White Plains, Andheri 400601

Dear Mr. Jake.

I'm filling out an application for the position of trainee computer engineer, which was posted on September 18 in The Times Of India. The job seems to be a great match for my background, skills, and interests in the workplace.

A computer engineer with experience and proficiency in Python, data analysis, a bit of AI/ML, and a cursory knowledge of web frameworks is needed for your position. I recently completed training on developing data science projects successfully. My practical experience in the computer engineering department at my institution as a programmer and a student provided a useful introduction to sophisticated computer operations. In addition, I served as the technical coordinator for the college's e-sports club, where I managed and inspired the club's members while learning about new technologies through club-related computer networks.

My professional background and objectives appear to align with those of your open positions. I'm sure I'll be able to do the work well. Additionally, I sincerely want to fill the post and work with B99 Software Pvt. Ltd.

Please take into account my request for a personal interview to go through my qualifications in greater detail and to learn more about this opportunity. I'll give you a call the following week to see if we can schedule a meeting. Please feel free to contact me at 914-779-2050 if you need to.

Thank you for your consideration. I look forward to talking to
you.

Sincerely,

Shubham M.

Enclosure
